Module 8: Handling Forms in Angular

## Assignment 2 – Create a Reactive Form

edureka!

Assignment – 2:

Problem Statement

Create simple Employee registration form using reactive form.

Perform the following operations to build the application:

1. Create a new component "reactive-form."

2. The form should display below mentioned fields:
- Full name
- Address
- City
- Email
- Phone No
- Password
- Confirm Password

3. Do not apply any validation.
4. Make use of CSS classes and Bootstrap to design the application.

Here is an example of how your application should look:

After building the application, prepare a ZIP file of the application code and upload it on LMS in Assignment solution section for evaluation.
