Module 11: Testing and Application Deployment in Angular

Assignment 1 – Create an Angular application and test it using karma & jasmine

edureka!

edureka!

Assignment – 1:

Problem Statement

Write test case to check title is of type Heading3 <h3>

Follow the steps below to build the application:

1. Build and angular application and in the HTML template add a <h3> tag

2. Verify that karma.config.js file is created

3. Verify that jasmine dependencies are added to package.json

4. In the app.component.spec.ts file write test cases for the component

After building the application, prepare a ZIP file of the application code and upload it on LMS in Assignment solution section for evaluation.
